

4Life Transfer Factor Plus[®]

4Life
TOGETHER, BUILDING PEOPLE™

TRI-FACTOR™ FORMULA

Superior Immune System Support

Inside your body there is an amazing protection mechanism called the immune system. It is designed to defend you against outside invaders that can compromise your health. Knowing this, it's easy to see why maintaining a healthy immune system means living a healthier life. Understanding the function of the immune system helps us appreciate the value in maintaining its healthy function.

No matter what the immune system needs, 4Life Transfer Factor Plus Tri-Factor Formula delivers powerful support to help you achieve a strong and healthy immune system that knows exactly what to do, when to do it, and how to get it done quickly. It combines the **intelligence** of 4Life Transfer Factor E-XF™, the **intuition** of NanoFactor™, and the power of 4Life's proprietary Cordyvant™ blend to regulate, boost, and balance your immune system. Scientific studies report that this Plus Formula can boost immune cell responsiveness 437 percent above normal immune system response.¹

Key Points

- **Transfer Factor E-XF:** Transfer factors are molecules found within the bodies of all mammals and birds. Transfer factors provide immune **intelligence** and promote the immune system's ability to recognize, respond to, and remember invaders seeking to threaten health. Transfer Factor E-XF is 4Life's advanced transfer factor blend. Through a patented process exclusive to 4Life, transfer factors from both cow colostrum and chicken egg yolks are combined to produce synergistic immune-enhancing support.
- **NanoFactor extract:** Nanofractions are low-weight molecules found in the immune systems of certain mammals and birds. They possess natural **intuition** and function as part of the complex "command and control" network of the immune system. NanoFactor is 4Life's patent-pending extract of nanofractions from cow colostrum. NanoFactor helps immune cells know when to act, how to act, and when to rest.

While transfer factors and nanofractions each provide effective immune support on their own, intelligence and intuition are both needed for optimal immune response. **4Life Transfer Factor Tri-Factor Formula** brings together the **intelligence** of 4Life Transfer Factor and the **intuition** of NanoFactor, to regulate, boost, and balance the immune system... **according to what your body needs.**
- **Cordyvant blend:** Cordyvant contains ingredients that support the innate immune system, your first and instinctive response when your body is threatened. This blend contains known immune system nutrients, including: maitake and shiitake mushrooms, cordyceps, inositol hexaphosphate, beta glucans, soya bean extract, and olive leaf extract.
- **Scientifically Studied:** 4Life Transfer Factor Plus Tri-Factor Formula was developed by 4Life researchers and scientists in an effort to maximize immune system support. Results of an independent study conducted at the Russian Academy of Medical Science conclusively showed that 4Life Transfer Factor Plus Tri-Factor Formula propelled Natural Killer (NK) cell activity to a remarkable 437 percent above normal immune system response.¹

Did you know?

Transfer factor and nanofraction molecules can be shared safely and effectively. Whether they are transferred from cow to human or from chicken to human, these molecules are not species specific.

Technical Points

- Natural Killer (NK) cells are important immune cells that seek and destroy harmful cells through direct contact. When invaders enter your body, these NK cells are on the front lines of your immune defense.
- The extraction processes for transfer factors from egg sources is protected by US patent 6,468,534, and the combining process for transfer factors from cow colostrum and egg yolks is protected by US patent 6,866,868.
- 4Life Transfer Factor Plus Tri-Factor Formula is also included in 4Life's RiteStart[®] Men and Women.

DIRECTIONS: Take two (2) capsules daily with 8 oz of fluid.

Serving Size: One (1) Capsules
Servings Per Container: 60

Supplement Facts

Amount Per Serving		DV%
Zinc (as monomethionine)	5 mg	22%
4Life Transfer Factor Tri-Factor™ Formula	150 mg	**
Transfer Factor E-XF™ A patented concentrate of transfer factors and other natural components from cow colostrum and egg yolk.		
NanoFactor™ A proprietary blend of nano-filtered cow colostrum.		
Cordyvant™ Proprietary Blend Polysaccharide Complex	440 mg	**
IP-6 (inositol hexaphosphate)		
Soya bean Extract (phytosterols)		
Cordyceps sinensis (% cordycepic acids)		
Beta-Glucan (from baker's yeast)(Saacharomyces cerevisiae)		
Beta-Glucan (from Oat)(Avena sativa)		
Agaricus blazeii Extract		
Mannans (from Aloe vera)(leaf)		
Olive Leaf Extract (Olea europaea)		
Maitake Mushroom (Grifola frondosa)(whole plant)		
Shiitake Mushroom (Lentinus edodes)(whole plant)(S extract)		

**Daily Value (DV) not established

Other Ingredients: gelatin capsule, lemon peel.

KO

¹ Test results obtained from two independent NK cell studies conducted by Dr. Anatoli Vorobiev, head of Immunology, at the Russian Academy of Medical Science. The blind studies tested 4Life Transfer Factor E-XF (the primary ingredient in Tri-Factor Formula) and other immune system products.
