

4Life Transfer Factor®

CHEWABLE

Great-Tasting Immune System Support

On the go? Just pick up a couple of 4Life Transfer Factor Chewable tablets and you're on your way! 4Life Transfer Factor Chewable comes in a great-tasting citrus-cream flavored chewable tablet and lets you enjoy great immune system support for fabulous everyday living.

4Life Transfer Factor Chewable includes 4Life's proprietary Transfer Factor E-XF™ blend, which provides advanced immune system support to your body's immune system.

Key Points

- **Transfer Factor E-XF:** Transfer factors are molecules found within the bodies of all mammals and birds. Transfer factors provide immune intelligence and promote the immune system's ability to recognize, respond to, and remember invaders seeking to threaten health. Transfer Factor E-XF is 4Life's advanced transfer factor blend. Through a patented process exclusive to 4Life, transfer factors from both cow colostrum and chicken egg yolks are combined to produce synergistic immune-enhancing support.
- **Scientifically Studied:** Results of an independent study conducted at the Russian Academy of Medical Science conclusively showed that 4Life Transfer Factor Advanced Formula boosted Natural Killer (NK) cell activity 283 percent above normal immune system response.¹
- **Shared Immune Knowledge:** The two most abundant and safest sources of transfer factors are cow colostrum and chicken egg yolks. These molecules can be transferred safely to humans, making cow colostrum and chicken egg yolk excellent sources for immune system support.

Did you know?

Transfer factors were first discovered in 1949 by Dr. H. Sherwood Lawrence. Since that time, more than \$40 million has been spent on hundreds of clinical studies and papers published on transfer factors.

Technical Points

- Natural Killer (NK) cells are important immune cells that seek and destroy harmful cells through direct contact. When invaders enter your body, these NK cells are on the front lines of your immune defense.
- The extraction process for transfer factors from egg sources is protected by US patent 6,468,534; and the combining process for transfer factors from cow colostrum and chicken egg yolks is protected by US patent 6,866,868.
- Transfer Factor E-XF is included in many of 4Life's products, including: NutraStart®, and Fiber4Life®.

1. Test results obtained from two independent NK cell studies conducted by Dr. Anatoli Vorobiev, head of Immunology, at the Russian Academy of Medical Science. The blind studies tested 4Life Transfer Factor E-XF (the primary ingredient in Tri-Factor Formula) and other immune system products.

*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent disease. For use in the United States.
